

## Thief Sampler (TSI25)

The eDART Thief Sampler unit is specifically designed to sample slurry and be installed and removed from the process stream on-line. It is also designed to fit onto the Dual eDart body where valve turbulence provides a good representative sample.

### Materials of Construction

- Body Material - 316 Stainless Steel
- Polyurethane Disc Seals

### Standard Sizes

- 125ml Sample for 80mm to 400mm line sizes

### Options

- Pneumatic Piston Actuated (Double Acting or Spring Return)
- Timed / untimed Solenoid valves
- Control boxes for automated sampling

### Features

- Eliminates product spillage
- Compact design
- Line Pressure not exposed to atmosphere
- Low and Easy Maintenance
- Locally Manufactured
- Moving parts fully removed from the line in the non-sampling position to extend the sampler life
- Simple and Robust

### Applications

- Grab samplers
- Sampling campaigns
- Plant commissioning
- Composite/shift sampling
